

**Retail Hydrogen Station Network Status in California****Updated April 3, 2025**

The gaseous hydrogen supply chain in Southern California is gradually improving with several stations that have already returned to service. Over the next few quarters, the remaining hydrogen stations that were temporarily "Unavailable" are expected to come back "Online."

*Drivers are encouraged to plan their refueling by checking station status at <https://m.h2fcp.org> or their preferred hydrogen station status app. \* Additionally, we will update the following table as we receive notice of upcoming station re-openings.*

*Southern California hydrogen stations' operational status.\**
